

P2P SERIES - SUMMER 2026 PRICING

**"GREAT SOUNDING AMP! BEAUTIFUL TONES, VERY FLEXIBLE, AND QUIET. FANTASTIC WORKMANSHIP ALL AROUND."
"I'M STILL DIGGING MY SPEED SHOP TWEED DELUXE!" - JOE SATRIANI**

Since 2013, every Speed Shop 5E3-P2P Studio-Series amplifier has been (and continues to be) hand-built personally by Rondo (inventor of the point-to-point 5E3). P2P combos include your choice of the Speed Shop's custom A12Q or B12Q AlNiCo speaker (vintage Jensen speakers are also available) or the Speed Shop's ceramic C12NS speaker. Also included in all P2Ps are a Speed Shop TD58OT custom reproduction output transformer (wound in-house by Rondo) plus custom Speed Shop signal capacitors, a custom polished stainless-steel chassis, and a '6452' OEM power transformer custom made for Rondo by Mercury Magnetics. Resistors and sockets are all NOS. Also, all power tubes (if tubes are ordered) are matched for current in the amplifier. (A complete NOS tube set comes standard in P2P combos.) All amplifiers are auditioned/tested for several hours by Rondo prior to shipping.

"The 5E3-P2P represents the signature amplifier of the Tweed Deluxe Speed Shop and is the finest build I offer. Most every component is either NOS or custom-made to my specifications. I assemble each amp as if building it for myself - and I am a perfectionist. Moreover, the 1958-'59-'60 narrow-panel 5E3 Tweed Deluxe is a true classic that deserves to be put together in the finest fashion. And that is what I provide - an heirloom-worthy musical instrument. It would be my pleasure to build one for you. Thanks for checking it out!" -Rondo

CHASSIS ONLY

(Does not include cabinet, tubes, or speaker)

TOTAL: \$2195

(Shipping Not Included)

COMPLETE COMBO AMP

(Includes lacquered tweed cabinet, NOS tubes, A12Q speaker)
